

Milwaukee Academy of Science Acceptable Use Policy for Students

The purpose of this document is to inform parents, guardians, and students of the rules governing the use of district and personal technology resources while on or near school property, and at school-sponsored activities, as well as the use of technology resources via off-campus remote access.

Introduction

The Milwaukee Academy of Science (MAS) is pleased to offer students access to district computers, communications systems¹, the Internet and an array of technology resources to promote educational excellence. Each student is responsible for her/his use of technology, whether personal or district-provided. While using district and personal technology resources on or near school property, and at school-sponsored activities, as well as using district technology resources via off-campus remote access, each student must act in an appropriate manner consistent with school, district, and legal guidelines. The Milwaukee Academy of Science educates students about appropriate online behavior, including interacting with other individuals on social networking websites and in chat rooms and cyberbullying awareness and response. It is the joint responsibility of school personnel and the parent or guardian of each student to educate the student about his/her responsibilities and to establish expectations when using technology.

¹ Communication systems include: e-mail, web sites, social networking, cell phones, pagers, text messaging, instant messaging, blogging, podcasting, listservs, and/or other emerging technologies.

Using the Internet and Communications Systems

District technology resources are provided to students to conduct research, complete assignments, and communicate with others to further their education. Access is a privilege not a right; as such, general rules of school behavior apply. Access to these services is given to students who agree to act in a considerate and responsible manner. Just as students are responsible for good behavior in a classroom or a school hallway, they must also be responsible when using school computer networks or personal technologies. Students must comply with district standards and honor this agreement to be permitted the use of technology.

All digital storage is district property, and as such, school staff will review files and communications to maintain system integrity and ensure that students are using technology responsibly. Students should not expect that files stored on district servers will be private.

The educational value of technology integration in curriculum is substantial. Access to the Internet will enable students to use online libraries and databases. Families should be warned that some material accessible via the Internet might

contain items that are illegal, defamatory, inaccurate, profane, sexually oriented or potentially offensive to some people. While the intent is to make Internet access and email available to further educational goals and objectives, students may find ways to access these other materials as well. MAS does not condone or permit the use of this material and uses content filtering software to protect students to the extent possible. Parents and guardians must be aware that content filtering tools are not completely fail-safe and while at school, direct supervision by school personnel of each student using a computer is desired but not always possible. Students are expected to use technology resources in a manner consistent with the rules below and will be held responsible for their intentional misuse. MAS believes that the benefits of student access to the Internet and email in the form of information resources and opportunities for collaboration exceed any disadvantages. Ultimately, parents and/or guardians are responsible for setting and conveying the standards that their children should follow when using technology. If a student accidentally accesses inappropriate material they should back out of that information at once and notify the supervising adult.

Internet Publishing

As part of your child's education at Milwaukee Academy of Science, their work, picture, and opinions may be posted on the school's website or a school sponsored Internet project. All web pages created by students and student organizations on the districts computer system will be subject to treatment as district-sponsored publications. Accordingly, the district reserves the right to exercise editorial control over such publications.

Proper and Acceptable Use of All Technology Resources

All district technology resources, including but not limited to district computers, email, and the Internet, must be used in support of education and academic research and must be used in a manner consistent with the educational mission and objectives of MAS.

Activities that are permitted and encouraged include:

- school work;
- original creation and presentation of academic work;
- research on topics being studied in school;
- research for opportunities outside of school related to community service, employment or further education.

Activities that are not permitted when using district or personal technologies include but are not limited to:

- plagiarism or representing the work of others as one's own;
- cyberbullying; using obscene language, harassing, insulting, ostracizing, or intimidating others;

2010-2011 School Year K4-High School Updated AUP

- searching, viewing, communicating, publishing, downloading, storing, or retrieving materials that are not related to school work (searching inappropriate materials is not permitted);
- damaging or modifying computers or networks;
- intentional or neglectful transmission of viruses or other destructive computer files; hacking into district or external computers; intentionally bypassing district filters;
- use of USB, bootable CDs, or other devices to alter the function of a computer or a network;
- online sharing of any student's name, home address, phone number or other personal information;
- non-educational uses such as games, role-playing multi-user environments, gambling, junk mail, chain mail, jokes or raffles;
- participating in online chat rooms or using instant messaging, unless specifically assigned by a teacher;
- use of district resources for commercial purposes, personal financial gain, or fraud;
- any activity that violates a school rule or a local, state, or federal law.

Students are expected to report cyberbullying, harassment, threats, hate-speech and inappropriate content to a teacher or administrator. If a student has any questions about whether a specific activity is permitted, he or she should ask a teacher or administrator.

Privacy and Security

Students must use district technologies responsibly and in a secure manner. They must not share their logins, passwords, or access with others.

Online Assessments

Student assessments may be conducted using technologies such as the Internet. Normally, students will use these technologies as a part of their instructional day. Privacy and security, as defined above, along with confidentiality of assessment responses, are expected.

Vandalism

Any intentional act by a student that damages district technology hardware, software, operating systems, or data will be considered vandalism and will be subject to school rules and disciplinary procedures. Any intentional act that requires a person's time to repair, replace, or perform corrective work on district technologies or data is also considered vandalism.

Consequences of Misuse

A student can be disciplined for off campus speech or behavior that results in substantial and material disruption of the learning environment. Misuse of personal or district technology resources while on or near school property and at school-sponsored activities, as well as the misuse of district technology resources via off-campus remote access may result in disciplinary action up to and including expulsion. In addition, the student's use of district technologies may be suspended or restricted. Furthermore, intentional unauthorized access and/or damage to networks, servers, user accounts, passwords, or other district resources may be punishable under local, state, or Federal law.

Reliability and Limitation of Liability

MAS makes no warranties of any kind, expressed or implied, for the technology resources it provides to students. MAS will not be responsible for any damages suffered by the student, including those arising from non-deliveries, misdeliveries, service interruptions, unauthorized use, loss of data, and exposure to potentially harmful or inappropriate material or people. Use of any information obtained via the Internet or communications technologies is at the student's own risk. MAS specifically denies any responsibility for the accuracy or quality of information obtained through the Internet. The student and his/her parent/guardian will indemnify and hold MAS harmless from any losses sustained as the result of misuse of the district's technology resources by the student.

Milwaukee Academy of Science
Acceptable Use Policy for Students

The purpose of this document is to inform parents, guardians, and students of the rules governing the use of district and personal technology resources while on or near school property, and at school-sponsored activities, as well as the use of technology resources via off-campus remote access.

As a student at the Milwaukee Academy of Science, I agree to comply with the technology policies outlined above.

X _____
(Student Signature) (Date)

I understand the school policies regarding technology use and have discussed them with my child. I understand that this form gives my permission for my son/daughter to access the Internet, including email, and that his/her user privileges will be revoked as well as the possibility of legal action, if conditions as outlined in the policy are violated.
