

FREE tutoring is available for eligible MAS students.

The Milwaukee Academy of Science offers Supplemental Educational Services, known as SES, to eligible students for the 2011-2012 school year. SES is a wonderful opportunity to receive additional instruction in Math, Reading and/or Science in a motivational setting.

Approved providers must offer students extra academic help anytime outside of the regular school day. After school is the most common time of SES to be offered, but it could also take place before school and on weekends.

Providers many offer services in a variety of settings:

- Schools
- Public libraries
- Provider office
- Family home
- Community centers
- Places of worship

Many providers offer "hands on" tutoring by trained instructors. Others offer Internet-based instruction that students can access through a computer at home, in a school, or at a community center.

SES is offered free of charge to all eligible students. In order to be eligible to participate, students must meet income standards based on the MAS 2011-2012 Free and Reduced Meal application. Currently, 917 students are eligible for SES services.

The number of seats available is limited. If enrollment exceeds available seats a selection process will be used to select the children who get seats. Priority will be given to low-income students.

Please feel free to contact the main office for help in making an informed decision about this unique educational opportunity.
